OF THE

DEPENDENT RESURVEY

OF THE

THIRTEENTH STANDARD PARALLEL NORTH,

THROUGH RANGE 74 WEST,

A PORTION OF THE EAST BOUNDARY,

THE NORTH BOUNDARY,

AND

THE SUBDIVISIONAL LINES,

TOWNSHIP 53 NORTH, RANGE 74 WEST,

OF THE SIXTH PRINCIPAL MERIDIAN,

IN THE STATE OF WYOMING.

EXECUTED BY

JOEL T. EBNER

CADASTRAL SURVEYOR

Under Special Instructions dated JULY 29, 1994, approved JULY 29, 1994, which provided for the surveys included under Group Number 595, and assignment instructions dated JULY 29, 1994.

Survey commenced JUNE 3, 1996

Survey completed AUGUST 15, 1996

641-6030

THIRTEENTH

STANDARD

PARALLEL

NORTH

T. 53 N., R. 74 W., Sixth Principal Meridian, Wyoming

CHAINS

The following field notes are those of the dependent resurvey of the Thirteenth Standard Parallel North, through Range 74 West, a portion of the east boundary, the north boundary, and the subdivisional lines, Township 53 North, Range 74 West, of the Sixth Principal Meridian, Wyoming.

Louis F. Stahle surveyed the Thirteenth Standard Parallel North(south boundary) in 1883. Mortimer N. Grant surveyed the remaining exterior boundaries and the subdivisional lines in 1883. Dell Cazier and Dale C. Wilson dependently resurveyed the east boundary in 1978.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions for Group No. 595, Wyoming, dated July 29, 1994.

Preliminary to the resurvey, the lines of the previous surveys were retraced and diligent search was made for all corners and other calls of the field note record. Identified corners were remonumented in their original positions; lost corners were reestablished and monumented at proportionate positions based on the latest official record, but only after exhausting every possibility of finding direct evidence of such corners. The retracement data was thoroughly verified and only true line field notes are given herein, which refer to the completed survey.

The survey was executed with a WILD Model T1000 theodolite, WILD Model DI-5S electronic distance meter and by chaining methods. The instruments were maintained in proper adjustment at all times. The directions of all lines refer to the true meridian, determined by hour angle observations of the sun at various points along the lines of survey and carried forward by sustained angulation.

Detectable Electronically Energized Particles (DEEP-1 TM) were buried as memorials at certain corner monuments. The "DEEP-1" is composed of strontium encased in a color coded plastic container. The units are 1 inch in diameter, 2½ ins. long, weigh 2½ ounces, and are magnetically detectable to an average depth of 8 feet.

The geographic position of the southeast corner of the township, based on NAD 27 and determined by satellite positioning methods, is:

Latitude 44° 31' 26.42" N., Longitude 105° 41' 45.38" W.

The mean magnetic declination is 12° E.

GENERAL DESCRIPTION	
<p>The area embraced by this survey is situated in the northwestern portion of Campbell County, approximately 20 miles northwest of Gillette, Wyoming. The elevation ranges from about 4,100 feet to about 4,600 feet above sea level. The terrain varies from nearly level on the lower elevations to rolling and broken in the upper elevations. A high divide runs through the center of the township in a northerly and southerly direction. The soil is primarily sandy loam and the vegetation consists of scattered sagebrush and native grasses.</p> <p>The northwest corner of the township is drained by Middle Prong Wild Horse Creek which flows northwesterly aided by Box Elder and Gibbon Draws which flow northerly. The remaining portion of the township is drained by numerous washes and draws which generally flow easterly. There are several active ranching operations and a few areas of bottom land under cultivation. There has been some oil and gas exploration resulting in several producing wells.</p> <p>Access is provided by Middle Prong Road which runs through the northern portion of the township, supplemented by several oil field roads and numerous trail roads which provide good access to most of the area.</p>	

FIELD ASSISTANTS

CERTIFICATE OF SURVEY

I, Joel T. Ebner, Cadastral Surveyor, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 29th day of July, 1994, I have dependently resurveyed the Thirteenth Standard Parallel North, through Range 74 West, a portion of the east boundary, the north boundary and the subdivisional lines, Township 53 North, Range 74 West, of the Sixth Principal Meridian, in the State of Wyoming, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.

SEP 22 2000

(Date)

(Cadastral Surveyor)

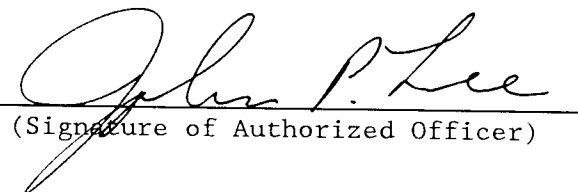

CERTIFICATE OF APPROVAL

BUREAU OF LAND MANAGEMENT
Cheyenne, Wyoming

The foregoing field notes of the dependent resurvey of the Thirteenth Standard Parallel North, through Range 74 West, a portion of the east boundary, the north boundary, and the subdivisional lines, Township 53 North, Range 74 West, Sixth Principal Meridian, Wyoming, executed by Joel T. Ebner, Cadastral Surveyor, having been critically examined and found correct, are hereby approved.
